ZHONGCANG ROBOTICS (NANJING) CO., LTD

Manufacturer of Forklift AGV robots & Service provider of warehousing solutions.

ZCNEST was founded in 2018, with forklift AGV robots as its core product, covering a full series of unmanned forklifts. The company independently develops three software systems, including AGV scheduling system, warehousing control system, and intelligent warehousing management system. Through hardware to software with a complete technology system, core algorithms and control technology for mobile robots.

**Self-produced
Optimized quality control**

6 + Establishment
50 + Patents
120 + Partners
40 + R&D Personnel

Design **Site Renovation** **Network Implementation** **On-site Deployment**

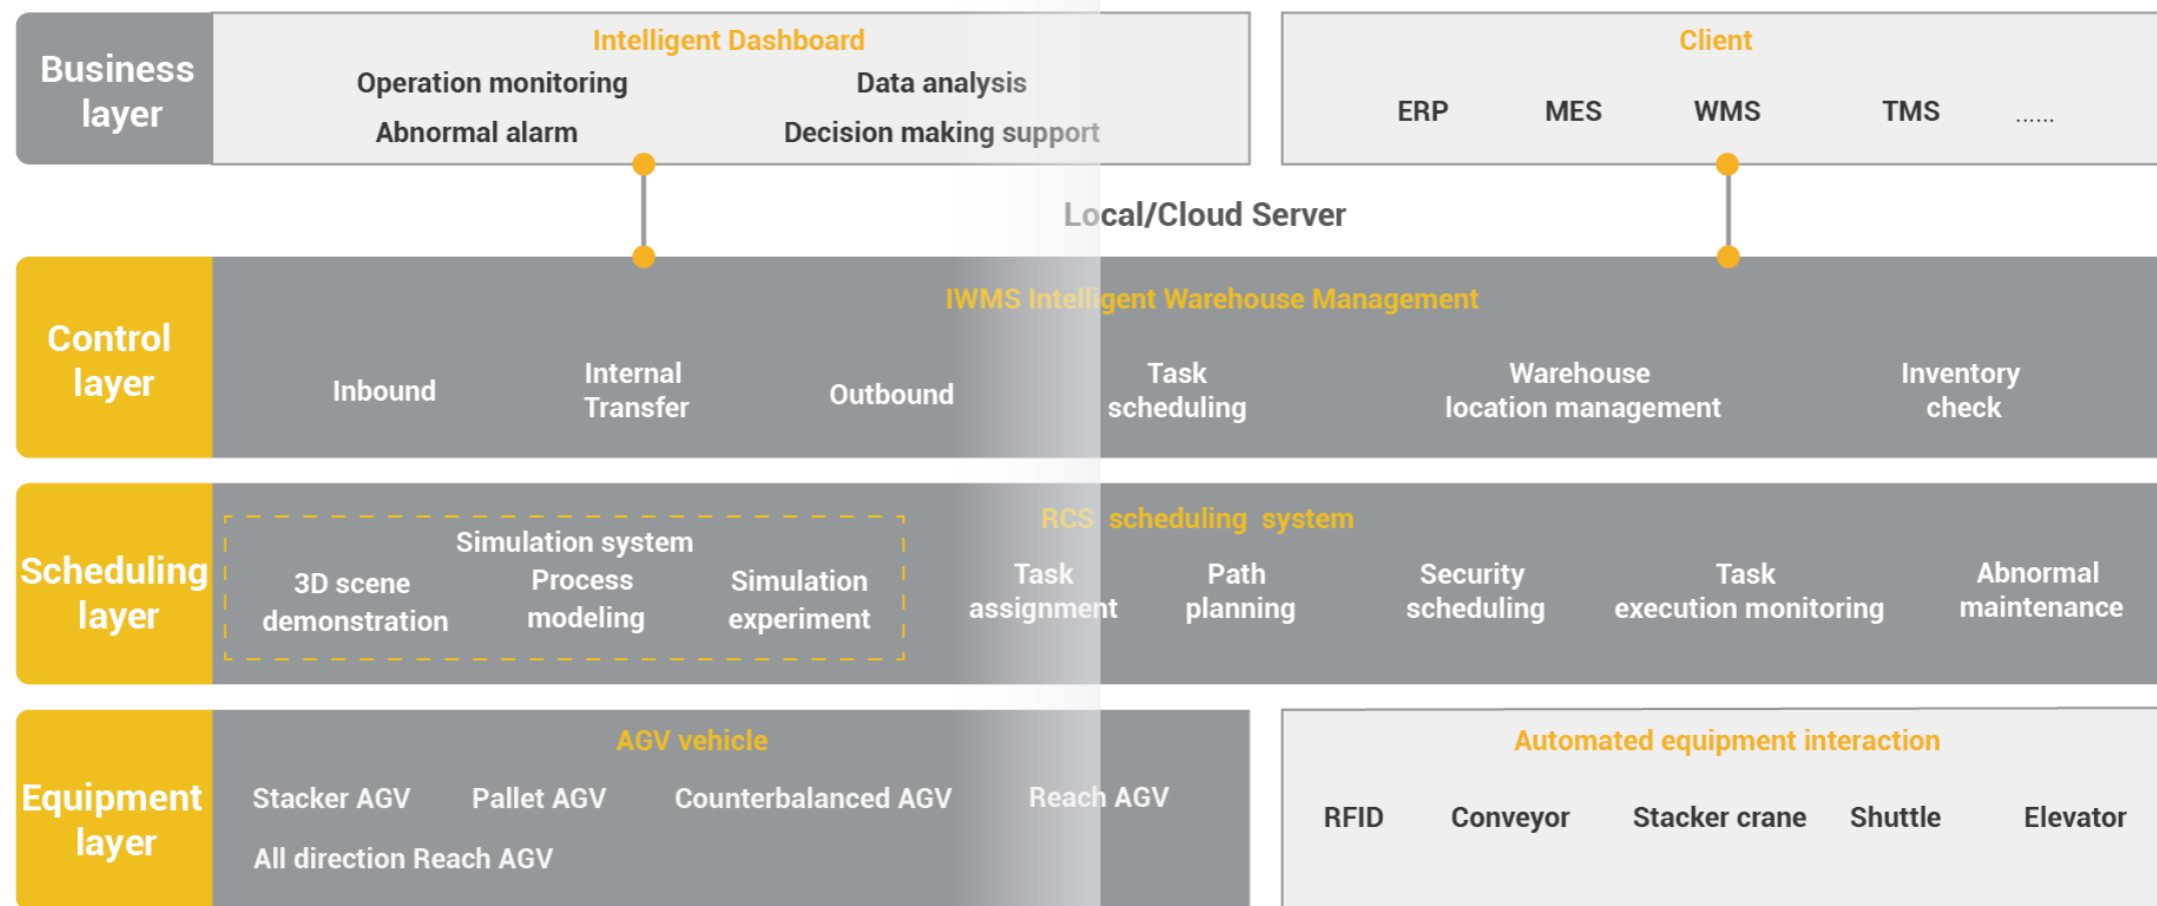

2019 Complete the first AGV system project
2021 Completing Pre-A Financing
2023 New production base built, nearly 10000 square meters factory
2024 Start partnership in United States and South East Asia

Efficiency Optimization **Guidance & Training** **After-sale Service** **System Upgrade**

2018 ZCNest is officially established Initiated the R&D of **forklift robots**
2020 Self-developed AGV systems applied in medicine and rail transit industries
2022 ZCNest Passes National High tech Enterprise Certification
2023 AGV systems applied in consumer goods, supermarkets, manufacturing, and other industries

1 Complete self-developed architecture

2 Dynamic path planning

- ❑ Dynamic path planning based on real-time system
- ❑ Virtual reality and digital twin technology
- ❑ Dynamically interact with the position information of each robot
- ❑ Dynamic path planning based on real-time location information, various states of the robot, and related future tasks
- ❑ Capable of simultaneously scheduling a large number of robots of different models

1 Self developed robot core controller 2.0

- Distributed ARM architecture controller
- The protection level can reach IP68-40~70 °C
- Suitable for cold storage and outdoor use

Navigation	DM code 2D SLAM, 2D laser reflector 3D SLAM, satellite assisted navigation Visual assisted navigation	Safety	2D/3D laser obstacle avoidance Contact based obstacle avoidance and fall recognition
Communication	Industrial WIFI 2.4/5.8GHz 4G/5G Encrypted data transmission	Recognition	Pallet pick-up identification shelf identification Barcode scanning DM code scanning, RFID scanning, etc
Motion model	Dual differential wheel motion model Single wheel motion model Multi wheel motion model	Control model	Manual/Automatic
		Peripheral Interface	2*CAN 4 * Gigabit Ethernet 2*USB 2.0 4*USB3.0 2*RS485 2*RS232 8*DI/DO

2 Flexible and diverse hybrid navigation methods

- Positioning accuracy on millimeter
- Ensure automatic connection of multiple forklifts
- Suitable for both indoor and outdoor full scene coverage
- Stability and reliability of positioning compared to single positioning technology

3 360° 3D Protection System

- ① 360° visual obstacle avoidance
- ② Navigation LiDAR
- ③ Multi direction emergency stop
- ④ Tri color indicator light

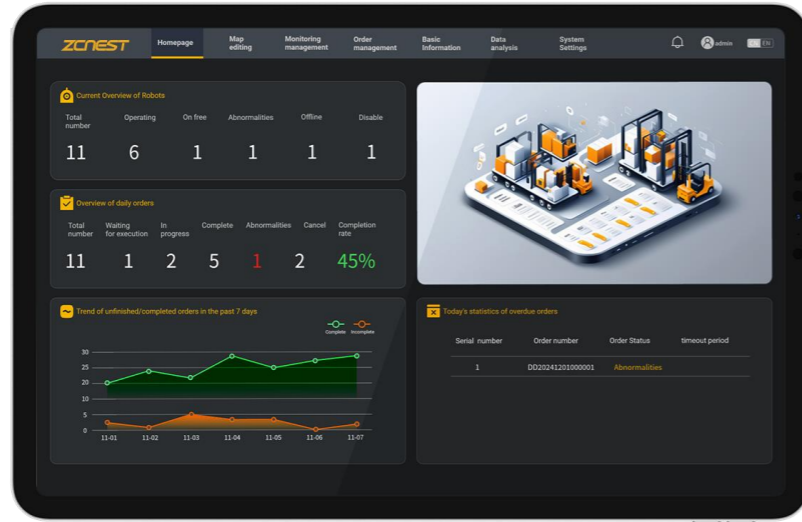

- Fork nib infrared detection ⑤
- Fork nib safety laser ⑥
- Overload alarm ⑦
- 360° laser obstacle avoidance ⑧
- 270° safety protection edge ⑨

4 Communication Methods

Application Cases	Common case	Long Route Wide Area	Long Route Wide Area	Confidential Area	Self-developed technology All Area(Max.3Km)
Installation Cost	Medium Cost Medium Efficiency	Medium Cost High Efficiency	Medium Cost High Efficiency	Medium Cost Low Efficiency	Low Cost High Efficiency

RCS

The self-developed Robot Scheduling System (RCS) by ZCNest restores the real scene through virtual models, and with the help of dynamic path planning algorithms and intelligent traffic control strategies, it can achieve dynamic optimal path planning, multi vehicle intelligent hybrid scheduling, autonomous obstacle avoidance and other functions for mobile robots, providing enterprises with efficient multi vehicle collaborative solutions and greatly improving handling efficiency

1 Features

- Multi vehicle and multi scenario support **01**
- Large scale scheduling management **02**
- Mature interface solution **03**
- Automated mapping and fast delivery implementation **04**
- Multi task distribution method **05**
- Instant alarm and abnormal troubleshooting **06**
- Position status management **07**
- Flexible charging strategy **08**
- Real time monitoring of AGV **09**

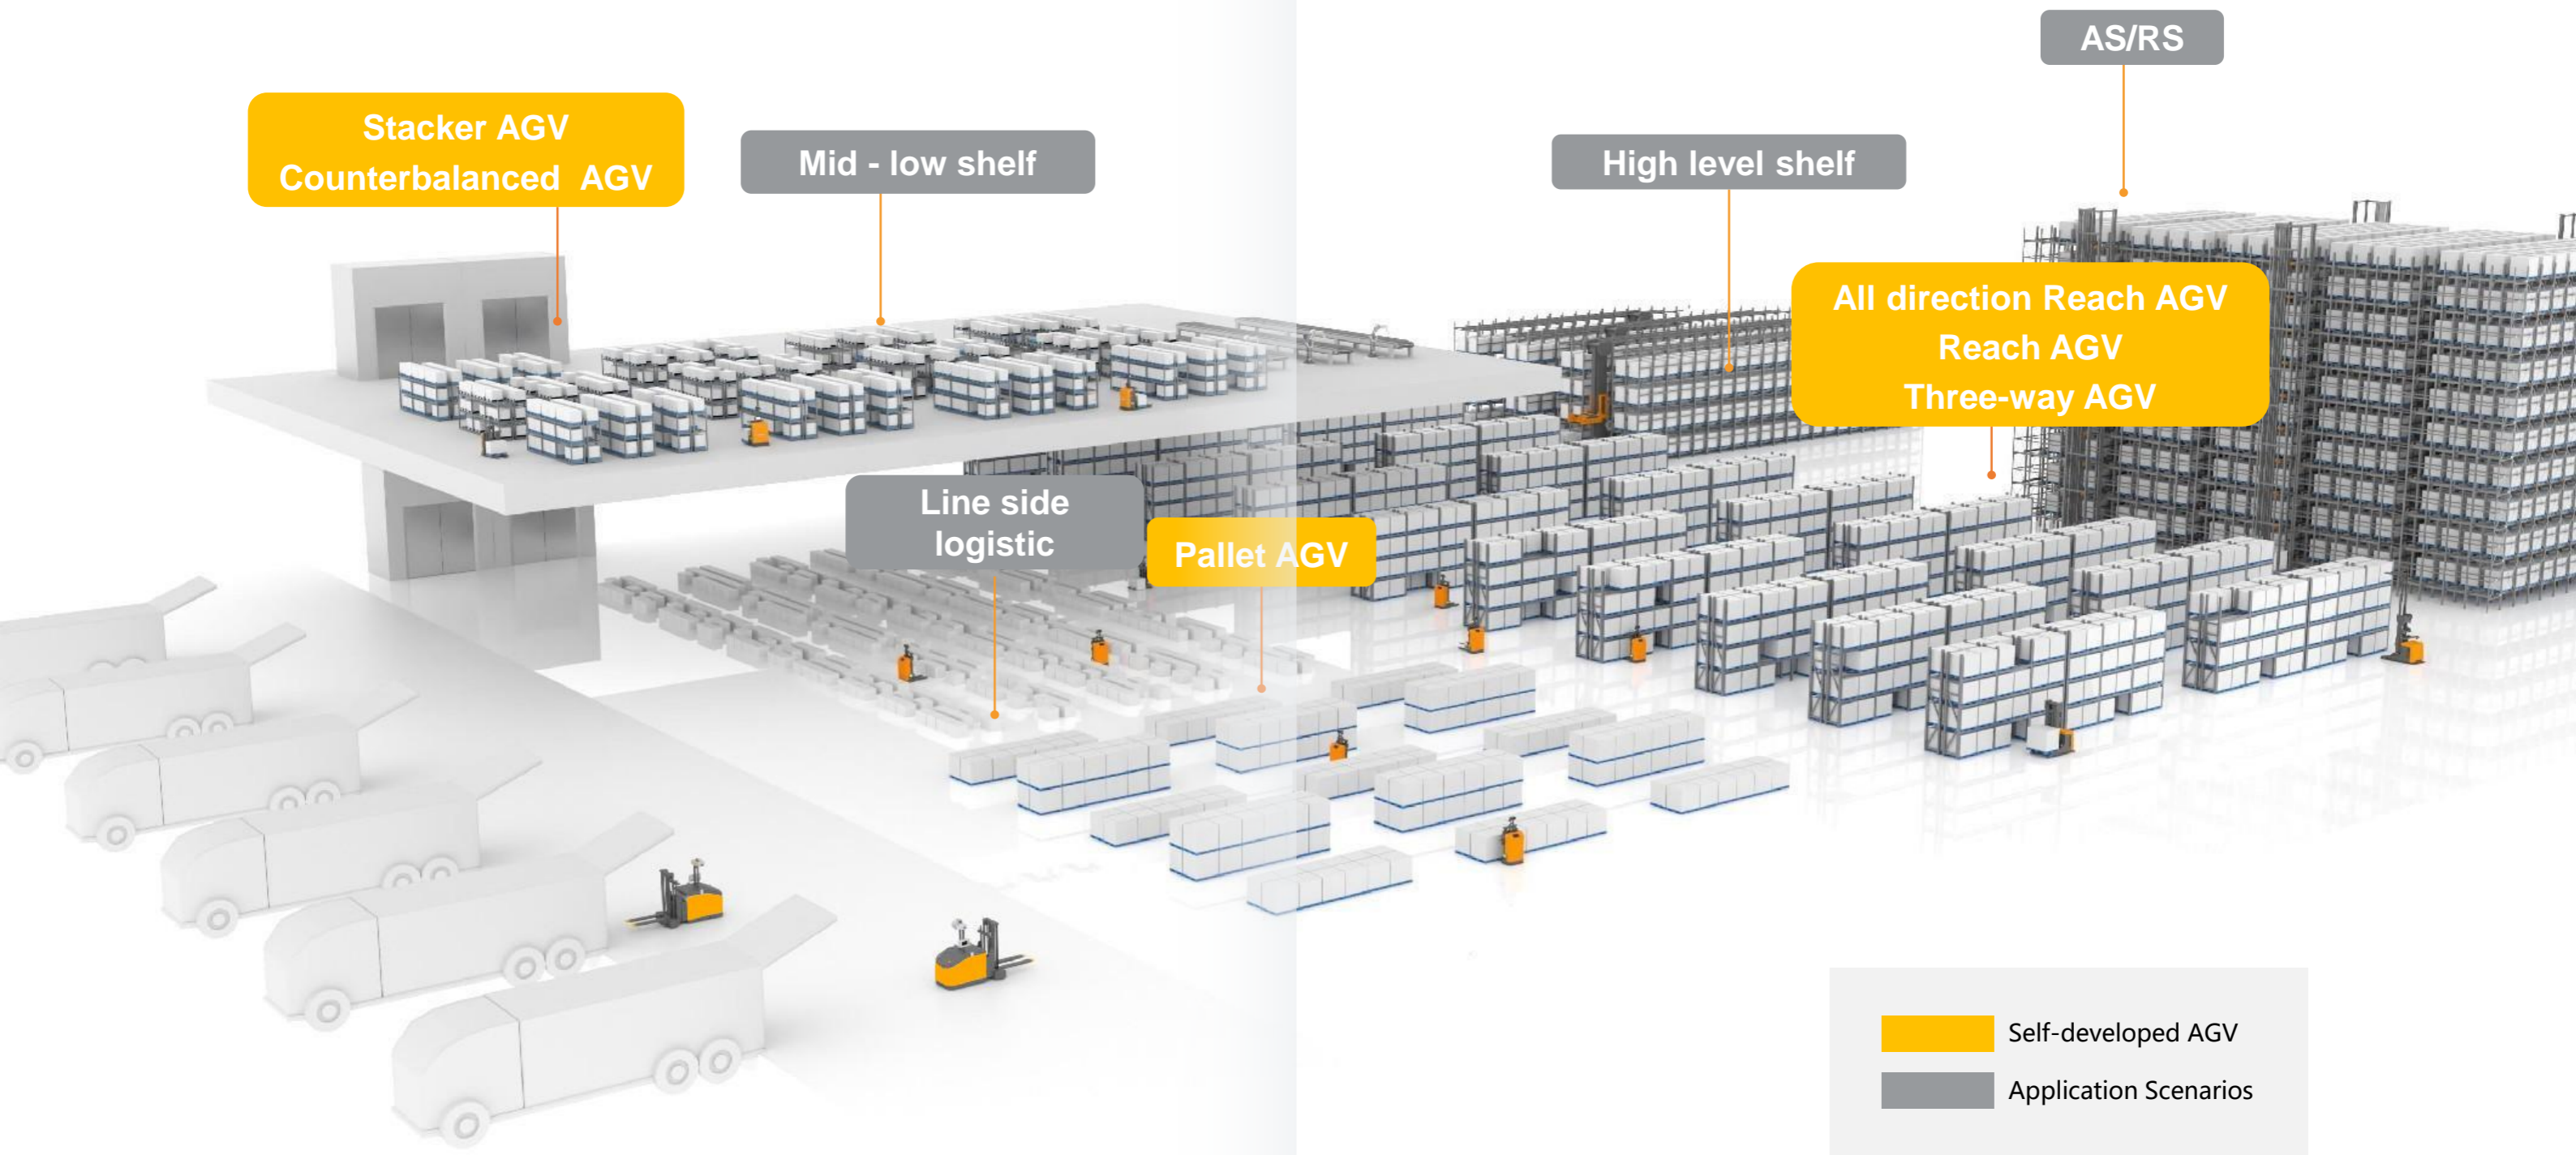

WMS

The Warehouse Management System independently developed by ZCNest covers the entire process management of warehousing and logistics, and seamlessly integrates with internal ERP/MES/WCS systems to provide real-time, comprehensive, and dynamic feedback on warehouse information.

2 Features

- Dynamic visualization management **01**
- Handheld terminal operation mode **02**
- Storage strategy **03**
- Integrating warehousing and logistics management **04**
- Elastic Expansion **05**
- Intimate integration with other systems **06**
- Refined management **07**
- Intelligent storage **08**
- User-friendly interface **09**

Pallet AGV

Type		Parameter
Product Name		Pallet AGV
Model		PG-CD16
Rated load		1600
Load center distance (mm)		● 600
General	Lifting height	● 120
	Fork size	Thickness: ● 60mm
		Single fork width: ● 190mm ○ 173mm
	Fork width	Length: ● 1150mm
		● 680 ○ 620 ○ 570
Minimum ground clearance height of fork	● 90	
Obstacle surmounting ability	Steps	● 10mm
	Slope	● 3%
	Cross ditch	● 30mm
Battery	mAh	● 48V50Ah ○ 48V105Ah
	Heating film + Temperature control	△ Heating film
Navigation	2D reflector panel	○
	3D Slam(mid360)	○
	3D Slam(mid360)+2D reflector panel	●
	3D Slam+Visual Tag Navigation	○
Communication	WIFI 2.4/5.8GHz	●
	Encrypted data transmission	○
	Optical communication	○
Safety	Voice alarm	●
	Navigation and obstacle avoidance	●
	Tri color light	●
	Warning light	● Curved light
		○ Position light
	Secure Edge	●
	2D obstacle avoidance LiDAR	● Two 2D laser radars on the front of the robot
	3D visual obstacle avoidance camera	△ 1 set; three-dimensional obstacle avoidance in the direction of the front end
		△ 3 sets; Front end direction and both sides
	Emergency stop switch	● Three sides
	Fork nib protection	○ Mechanical collision avoidance+photoelectric
● Dual photoelectric obstacle avoidance		
○ Depth camera obstacle avoidance+photoelectric		
Interaction	Human-machine interface	● Bilingual(Chinese/English)
Identification Function	Pick up identification function	○ Fork nib camera
	Release identification function	○ Fork nib camera
	Tray in place detection	● Mechanical in place inspection ○ Non contact in place detection
Information identification	RFID reader/writer	○
	Code reader	○
Weighing function	Overweight detection	●
	Accurate weighing	○

● Standard ○ Option △ Additional / No support

Stacker AGV

Type	Parameter
Product Name	Stacker AGV
Model	PG-CR
Rated load	●1600kg ○ 2000kg
Load center distance (mm)	●600mm
Lifting height	● 1600 ○ 2700 ○ 3700
Fork size	Thickness: ●56mm Single fork width: ●190mm ○ 170mm Length: ●1150mm
Fork width	●680 ○ 620 ○ 570
Minimum ground clearance height of fork	●90
Wide legs	○ 1600
Obstacle surmounting ability	Steps ●10mm Slope ●5% Cross ditch ●35mm
Battery	mAh ●48V50Ah Heating film + Temperature control ▲Heating film
Navigation	2D reflector panel ○ 3D Slam(mid360) ○ 3D Slam(mid360)+2D reflector panel ● 3D Slam+Visual Tag Navigation ○
Communication	WIFI 2.4/5.8GHz ● Encrypted data transmission ○ Optical communication ○
Safety	Voice alarm ● Navigation and obstacle avoidance ● Tri color light ● Warning light ● Curved light ○ Position light Secure Edge ● 2D obstacle avoidance LiDAR ● Two 2D laser radars on the front of the robot 3D visual obstacle avoidance camera ▲ 1 set; three-dimensional obstacle avoidance in the direction of the front end ▲ 3 sets; Front end direction and both sides Emergency stop switch ● Three sides Fork nib mechanical anti-collision ○ Mechanical collision avoidance+photoelectric ● Dual photoelectric obstacle avoidance ○ Depth camera obstacle avoidance+photoelectric
Interaction	Human-machine interface ●Bilingual(Chinese/English)
Identification Function	Reverse driving safety ● Optoelectronic obstacle avoidance ○ Laser/visual obstacle avoidance Pick up identification function ○ Drooping follow-up camera ○ Drooping follow-up multi line laser Release identification function ○ Drooping follow-up camera ○ Drooping follow-up multi line laser Cargo height detection function ○ Drooping follow-up camera ○ Drooping follow-up multi line laser Goods appearance inspection / Tray in place detection ● Mechanical in place inspection ○ Non contact in place detection
Information identification	RFID reader/writer ○ Code reader ○
Weighing function	Overweight detection ● Accurate weighing ○

● Standard ○ Option ▲ Additional / No support

Reach AGV

Type		Parameter
Product Name		Reach AGV
Model		PG-HCQ
Rated load		○ 1600 ○ 2000 ○ 2500 ○ 3000
Load center distance (mm)		● 600
General	Lifting height	○ 4600 ○ 6300 ○ 8500
	Wheelbase	● 1350
	Fork size	Thickness: ● 40mm Single fork width: ● 122mm Length: ● 1150mm
Obstacle surmounting ability	Steps	● 10mm
	Slope	● 5%
	Cross ditch	● 35mm
Part type	Side shifter	● Overall lateral displacement
	Adjustable distance fork dip angle	○
Battery	mAh	● 80V202Ah ○ 80V280Ah
	Heating film + Temperature control	△ Heating film
Hand operated equipment	Wire	●
Navigation	2D reflector panel	○
	3D Slam(mid360)	○
	3D Slam(mid360)+2D reflector panel	●
	3D Slam+Visual Tag Navigation	○
Communication	WIFI 2.4/5.8GHz	●
	Encrypted data transmission	○
	Optical communication	○
Safety	Voice alarm	●
	Navigation and obstacle avoidance	●
	Tri color light	●
	Warning light	● Curved light ○ Position light
	Secure Edge	●
	2D obstacle avoidance LiDAR	● Two 2D laser radars on the front of the robot
	3D visual obstacle avoidance camera	△ 1 set; three-dimensional obstacle avoidance in the direction of the front end △ 3 sets; Front end direction and both sides
	Emergency stop switch	● Three sides
Fork nib mechanical anti-collision	○ Mechanical collision avoidance + photoelectric ● Dual photoelectric obstacle avoidance	
Interaction	Human-machine interface	● Bilingual(Chinese/English)
Identification Function	Reverse driving safety	● Optoelectronic obstacle avoidance ○ Laser/visual obstacle avoidance
	Pick up identification function	○ Drooping follow-up camera ○ Drooping follow-up multi line laser
	Release identification function	○ Drooping follow-up camera ○ Drooping follow-up multi line laser
	Tray in place detection	● Mechanical in place inspection ● Mechanical tray compression/detachment detection ○ Non contact in place detection
Information identification	RFID reader/writer	○
	Code reader	○
Weighing function	Overweight detection	●
	Accurate weighing	○

● Standard ○ Option △ Additional / No support

Counterbalanced AGV

Type		Parameter
Product Name		Counterbalanced AGV
Model		PG-CP20
Rated load		2000kg
Load center distance (mm)		● 600
General	Lifting height	○ 1600 ● 2700 ○ 3700
	Wheelbase	● 1445
	Fork size	Thickness: ● 40mm
		Single fork width: ● 120mm Length: ● 1150mm
	Fork width	● 680 ○ 620 ○ 570
Minimum ground clearance height of fork	● 90	
Obstacle surmounting ability	Steps	● 10mm
	Slope	● 5%
	Cross ditch	● 35mm
Part type	Side shifter	△
	Adjustable distance fork dip angle	△
		△
Battery	mAh	● 48V200Ah
	Heating film + Temperature control	△ Heating film
Navigation	2D reflector panel	○
	3D Slam(mid360)	○
	3D Slam(mid360)+2D reflector panel	●
Communication	3D Slam+Visual Tag Navigation	○
	WIFI 2.4/5.8GHz	●
	Encrypted data transmission	○
Safety	Optical communication	○
	Voice alarm	●
	Navigation and obstacle avoidance	●
	Tri color light	●
	Warning light	● Curved light
		○ Position light
	Secure Edge	●
	2D obstacle avoidance LiDAR	● Two 2D laser radars on the front of the robot
	3D visual obstacle avoidance camera	△ 1 set; three-dimensional obstacle avoidance in the direction of the front end
		△ 3 sets; Front end direction and both sides
Emergency stop switch	● Three sides	
Fork nib mechanical anti-collision	○ Mechanical collision avoidance + photoelectric ● Dual photoelectric obstacle avoidance	
Interaction	Human-machine interface	● Bilingual(Chinese/English)
Identification Function	Reverse driving safety	● Optoelectronic obstacle avoidance ○ Laser/visual obstacle avoidance
	Pick up identification function	○ Drooping follow-up camera ○ Drooping follow-up multi line laser
	Release identification function	○ Drooping follow-up camera ○ Drooping follow-up multi line laser
	Tray in place detection	● Mechanical in place inspection ○ Non contact in place detection
Information identification	RFID reader/writer	○
	Code reader	○
Weighing function	Overweight detection	●
	Accurate weighing	○

● Standard ○ Option △ Additional / No support

All-direction Reach AGV

Type		Parameter
Product Name		All-direction Reach AGV
Model		PG – CQD15
Rated load		1500
Load center distance (mm)		●600
General	Lifting height	●4000mm
	Fork size	Thickness: ●40mm
		Single fork width: ●110mm Length: ●1150mm
Obstacle surmounting ability	Steps	●5mm
	Slope	●5%(unload)
	Cross ditch	●35mm(unload)
Battery	mAh	●48V200Ah
Navigation	2D reflector panel	●Cockpit
	3D Slam(mid360)	○
	3D Slam(mid360)+2D reflector panel	●
	3D Slam+Visual Tag Navigation	○
Communication	WIFI 2.4/5.8GHz	●
	Encrypted data transmission	○
	Optical communication	○
Safety	Voice alarm	●
	Navigation and obstacle avoidance	●
	Tri color light	●
	Warning light	●
	Secure Edge	●
	2D obstacle avoidance LiDAR	●Two 2D laser radars on the front of the robot
	3D visual obstacle avoidance camera	△ 1 set; three-dimensional obstacle avoidance in the direction of the front end △ 3 sets; Front end direction and both sides
	Emergency stop switch	●Three sides
Fork nib protection	○ Mechanical collision avoidance + photoelectric ● Dual photoelectric obstacle avoidance	
Interaction	Human-machine interface	●
Identification Function	Reverse driving safety	●
	Pick up identification function	○ Drooping follow-up camera ○ Drooping follow-up multi line laser
	Release identification function	○ Drooping follow-up camera ○ Drooping follow-up multi line laser
	Tray in place detection	● Mechanical in place inspection ● Mechanical tray compression/detachment detection ○ Non contact in place detection
Information identification	RFID reader/writer	○
	Code reader	○
Weighing function	Overweight detection	●
	Accurate weighing	/

● Standard ○ Option △ Additional / No support

Three-way AGV

Type		Parameter
Product Name		Three-way AGV
Model		PG-MCA16
Rated load		1600
Load center distance (mm)		●600
General	Lifting height	○4500 ○6500 ○8500
	Fork size	Thickness: ●50mm
		Single fork width: ●125mm Length: ●1200mm
Obstacle surmounting ability	Steps	●5mm
	Slope	●8%(unload)
	Cross ditch	●20mm(unload)
Battery	mAh	●48V460Ah ○48V600Ah
Navigation	2D reflector panel	●Cockpit
	3D Slam(mid360)	○
	3D Slam(mid360)+2D reflector panel	●
	3D Slam+Visual Tag Navigation	○
Communication	WIFI 2.4/5.8GHz	●
	Encrypted data transmission	○
	Optical communication	○
Safety	Voice alarm	●
	Navigation and obstacle avoidance	●
	Tri color light	●
	Warning light	●
	Secure Edge	●
	2D obstacle avoidance LiDAR	●Two 2D laser radars on the front of the robot
	3D visual obstacle avoidance camera	△ 1 set; three-dimensional obstacle avoidance in the direction of the front end △ 3 sets; Front end direction and both sides
	Emergency stop switch	●Three sides
	Fork nib protection	○ Mechanical collision avoidance + photoelectric ● Dual photoelectric obstacle avoidance
Interaction	Human-machine interface	●
Identification Function	Reverse driving safety	●
	Pick up identification function	○ Drooping follow-up camera ○ Drooping follow-up multi line laser
	Release identification function	○ Drooping follow-up camera ○ Drooping follow-up multi line laser
	Tray in place detection	● Mechanical in place inspection ● Mechanical tray compression/detachment detection ○ Non contact in place detection
Information identification	RFID reader/writer	○
	Code reader	○
Weighing function	Overweight detection	●
